2024 NUCCA
Fundraising Campaign

UCRF Research Supporting NUCCA

Since 1966, NUCCA care has long shown a vital connection between the spine and the central nervous system, positively influencing bodily functions. Research is fundamental to the NUCCA organization's commitment to evidence-based practices.

This year marks the 16th anniversary of the Small Steps to Success fundraising campaign for research. Thanks to our generous donors, we have advanced innovative research and collaborated with leading experts across various health disciplines.

UCRF Research Focus Areas for 2024

- **Posture Analysis Studies**
- **Radiographic Positioning Study**
- **Prevalence of the ASC in the population**
- **UCRF Student Scholarships for collaborative research projects with students and seasoned NUCCA practitioners**
- **Correction, Stability and Quality of Life**
- **Dizziness and the ASC**

Every Donation Makes a Difference!

Your support today empowers the Upper Cervical Research Foundation (www.ucrf.org) to continue its vital work in NUCCA research, ensuring a higher standard of health care for everyone.

There are many ways to contribute to our research. You can make a one-time donation or opt for monthly contributions. You can also honour a special occasion or a loved one's memory. As a non-profit, we rely on donor support and hope you'll join our fundraising campaign this year.
