UCRF Research Supporting NUCCA

Since 1966, NUCCA care has shown us just how closely the spine and the central nervous system are connected—and how restoring that connection can make a real difference in people's lives.

Research is central to everything we do. It enables us to continue learning, enhancing our skills, and providing patients with the highest quality care.

This year, we celebrate the 18th anniversary of the Small Steps to Success campaign. Over the years, thanks to the kindness and generosity of our donors, we have been able to initiate innovative research projects and collaborate closely with leading healthcare experts. Together, we are discovering new ways to bring hope, healing, and improved health to countless individuals.

UCRF Research Focus Areas for 2025

Anatometer / GSA Validation Study

Radiographic Positioning Agreement Study - R.A.S. System

Prevalence of ASC in the General Population

Developing a NUCCA Practice-Based Research Network

Student Research Mentoring Scholarships

Ongoing Blood and CSF Flow Migraine Study Data Review

The Optimal Correction of the ASC, Stability and Quality of Life Impact

Together, Small Steps Create Big Change

Your support today enables the Upper Cervical Research Foundation (www.ucrf.org) to carry on its essential work in NUCCA research, promoting a higher standard of healthcare for all.

There are many ways to support our research. You can make a one-time donation or choose monthly contributions. You can also honor a special occasion or a loved one's memory. As a non-profit organization, we rely on donor support and hope you'll join our fundraising campaign this year.

To see the results of our research efforts since 1971,
